

Autumn comes to the wood

Can you find these signs of autumn? Look around the woodland and the yard. Touch and smell, but please don't pick! What will happen to the things you find during the following season? You could colour the pictures later.

Look for fruits and berries.

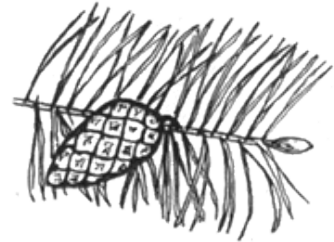

Look in the trees:

Holly berries
(what colour?)

Rowan berries
(what colour?)

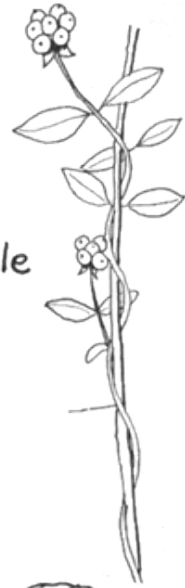

Pine cones
(can you see them in the pine trees?)

Look under the trees:

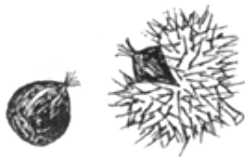

Blackberries
(what might eat them?)

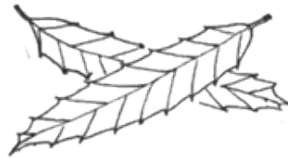

Honeysuckle berries

Look on the ground: Feel the leaves and nuts

Sweet chestnuts

chestnut leaves

Find the longest one

Beech nuts

beech leaves
